

Gaston Genaud

SENIOR SDET, DEVOPS ENGINEER & QA LEAD

PROFILE

Senior QA Automation Engineer (SDET), DevOps Engineer and QA Lead with 7+ years building scalable test automation and CI/CD across healthcare data, banking, e-commerce and gaming. I lead QA strategy, define standards and mentor teams, with deep end-to-end automation, Kubernetes-based test execution and AWS reliability experience. Hands-on with modern AI/LLM models — in both professional workflows and personal automation projects.

EXPERIENCE

Senior SDET, DevOps & QA Lead (Contractor)

Aug 2022 – Present

- QA Lead across multiple client engagements: define test strategy, standards and CI/CD practices, and mentor QA engineers.
- Led the Kubernetes migration of the end-to-end test infrastructure (Testkube on K8s), enabling scalable parallel execution and more reliable CI.
- Improved CI/CD reliability on GitHub Actions — resolved a critical Node.js toolchain regression and hardened build/test workflows, eliminating multi-hour pipeline failures.
- Frontend & REST API automation (Playwright, Nx, TypeScript) for an AI-assisted contract product, including SSO/SCIM (Entra ID) coverage.
- Mobile and performance automation for banking and e-commerce engagements (login performance, dockerized Android emulators).

EARLIER PROJECTS — CAYLENT, CAREJOURNEY, CIVICPLUS

- Built base Cypress frameworks and migrated SpecFlow (C#) suites to Cypress; mobile automation (Appium, Python, pytest, Behave); CircleCI parallel runs; load testing (Artillery, JMeter); AWS DevOps (Lambda, DynamoDB, RDS, CloudWatch, Taurus).

Senior QA Automation Engineer (Contractor, Part-time) · Aug 2022 – Dec 2022

Trick Gaming Studio LLC

Project: My Marketplace Builder

- Frontend and backend (REST API) automation, test design and CI; execution via Kubernetes and Azure DevOps.
- Stack: Serenity BDD, Selenium, Cucumber, TestNG, Java, JavaScript, Node.js, Cypress, Gherkin, POM, Lens.

Senior QA Automation & DevOps Engineer · Coderio SA Sep 2021 – Aug 2022

Clients: Iplan, Banco Patagonia, Cencosud

- Mobile, microservices and web automation (Node.js, JavaScript, Cucumber, Mocha, TestCafe, Karate, Jest, Appium); CI/CD pipelines and QA project management in Jira.
- AWS automation (DynamoDB, RDS, S3, CloudWatch) and Lambda development.

SSR QA Automation & QA Lead · SearchMas

Sep 2020 – Mar 2021

Client: Naranja (TAE)

- QA Lead for the Naranja account: led microservices test automation in JavaScript (Yadda, Supertest, Mocha, Cucumber) and load testing (Artillery, JMeter).

SSR Test Automation Engineer · Globant

Mar 2020 – Sep 2020

- Test automation with Selenium, TestNG, Cucumber, WebDriverIO and Maven; Bitbucket, SOAP UI, Postman, PL/SQL Developer.

GITHUB

github.com/GastonAGenaud

SKILLS

Test Automation

Cypress, Playwright, Selenium, Appium, WebDriverIO, Serenity BDD, Cucumber/Gherkin, TestNG, Jest, Mocha, Karate, POM

Languages

JavaScript, TypeScript, Python, Java, Node.js

DevOps & Cloud

AWS (Lambda, DynamoDB, RDS, S3, CloudWatch), Docker, Kubernetes, Terraform, Testkube

CI/CD

GitHub Actions, CircleCI, Jenkins, Azure DevOps

Performance

Artillery, JMeter, Taurus

AI / LLMs

Hands-on with modern AI models; LLM-assisted development & test generation

Tools & Leadership

Jira, Git, Postman; QA strategy, team mentoring

LANGUAGES

Spanish — Native

English — Advanced

EDUCATION

University Technician in Programming

National Technological University (UTN)
Coursework completed (thesis pending).

Systems Analyst

Instituto Cervantes
In progress.

JR QA Automation Engineer · Vates SA

Aug 2018 – Mar 2020

Clients: Bancor, Claro, BCI Seguros

- Mobile test automation (Appium with Python) plus server and web automation libraries (Node.js, mongo-memory-server, yadda, Cucumber, Mocha, TestCafe, Jest).
- Test case design, manual testing, CI pipelines and QA project management in Jira.

PERSONAL PROJECTS

AI & LLM Automation — Personal tools and agents built on modern AI/LLM models for workflow automation, data processing and productivity.

Maker & Home Automation — IoT smart-home systems with ESP32/Arduino, Home Assistant and MQTT; custom circuits and PCBs.

Open-Source Automation — Public test-automation projects on GitHub (Cypress + Cucumber, Appium + Selenium + Python); building an automation course & project generator.
